"com.gameloft.android.ANMP.GloftA3HM" folder "android / data" copy into. Enter the game.Mod: Free Weapons Free Bundles Free Consumables Free Brother Upgrades Free VIP This is a simulated war shooting game with console-level game graphics, movie version plot processing, relaxed game rhythm, rich game modes, and exciting game level design. It is the annual finale of Gameloft, everyone It's still worth taking serious fun for the machine friends. This makes players feel as if they have personally experienced the battles that determine the direction of World War II, which makes people feel like they have a sense of mission and make people excited. The sound effects are still outstanding. The shocking sound effects will undoubtedly heighten the atmosphere of war. Various explosions and gunfire continue to impact the player's cochlea. The most memorable thing in the game is the image of the shooting sound. The shooting sound will be different depending on the gun, and it matches the type of gun very well, just like experiencing the cruelty of standing war. In the war, there will be real voices added, and a scream constantly shakes the heart of the player. This sound also reminds many people of the footage in the movie, which feels very good. After entering the game, you can deeply feel a strong atmosphere of World War II. A series of familiar architectural styles such as France and Germany will come into the eyes of the players. Powerful 3D modeling shows the realistic images of mountains, ravines, buildings, etc. The sparkling water surface and the scene of falling leaves are all vividly displayed. After the battle began, the smoke and flames performed just right, and people deeply felt the cruelty and fierceness of the war. The presentation of the characters is much more real than the previous work, the facial expressions are clearly visible, and the movements have become much more flexible, no longer as dull as the previous work. As the battle progresses, the characters will gradually be stained with blood, and this subtle change is also clearly displayed, which is very impressive. The weapons in this work are all designed around the actual situation of World War II. They can be divided into five types: submachine gun, rifle, assault rifle, sniper rifle, and experimental weapon. Each type of gun has its own unique performance. Players can also use it in battle Experience the difference firsthand. These weapons can also be upgraded in performance. After the upgrade, the combat power will be greatly increased. In addition, there are heavy weapons such as grenade, Molotov cocktail, and rocket launcher for players to choose from. As the game progresses, players will also unlock comrades with different professional skills to help players pass the level. These comrades will automatically follow the player to fight and play a significant role in the battle. Join the heroic MULTIPLAYER shooting action of World War 2!Fight brave soldiers from around the globe on the frenzied multiplayer battlegrounds of World War 2 or become Sergeant Wright and experience a dramatic, life-changing single-player journey, in the aftermath of the D-Day invasion.CLIMB THE ARMY RANKS IN MULTIPLAYER > 4 maps to master and enjoy. > 2 gameplay modes to begin with: Free For All and Team Deathmatch.> Unlock game-changing perks by playing with each weapon class!> A soldier's only as deadly as his weapon. This is a really great game you guys did great with it. My one question, is why did you take off the 2nd Brothers in Arms, that one was the best. It was a fps game with Greta ww2 gameplay. Please bring it back. And one more thing, you guys would get even more popular if you made a good world war 1 or 2 fps brothers in arms game. You guys would do great with that, think of Call of duty World War 2, the call of duty fans hadn't gotten that exited in so long, but then they went back to their roots, the thing that got them started, world war 2, same with battlefield series they went back and made a killing with battlefield 1, please, please, please consider this, thanks @ Go Gameloft!Did u try it. P.s. You guys would be the best mobile game makers in mine and a lot of other people's opinions if you made a ww2 fps game, I know I'm not just speaking for myself Despite the numerous glitches I had with this game when it came out, it has gotten even worse than when it was new! The introduction of multiplayer was awesome but with the recent update: glitches, lag, and spending actual money to get good stuff is the name of the game. I don't have the time or money to buy all the best guns and because of the last update it is no longer fun or fair. Whether it is a bad connection to the server (which I didn't have an issue with before this update), glitching through stairs, or opponents having overpowered weapons and buffs, this game frustrates me every time I play! Single player is not as bad but the story line is crap. Also, single player is way to easy and when your "brothers" die in a mission they don't die all together, which contradicts to the plot at the beginning of the game. Guns are way too expensive and only people with good money to throw away seem to be good on multiplayer since the have so many buffs. This game used to be fun, but now it is boring on single player and annoying in multiplayer. I understand that multiplayer is new and I think it will get better as the tweak it a little. By the way, the whole energy system is dumb. They make you wait for it to refill before you can do more campaign and multiplayer. They should get arid of it entirely. I could go on forever about problems in this game. However, I haven't lost all hope in it yet. Has a lot of promise too it. Here's to a good update! I use to get daily rewards from this game but now I don't it does not even offer them to me and nothing is more frustrating than not getting my daily reward either fix this bug or give all the people who did in app purchase their money back pick and chose the way you want to deal with this app and no I don't like sniper fury I prefer this game over that game but please fix this game I love my daily rewards it keeps me coming back to the game every time if you fix it I will give you 5 stars but if you don't it will stay at 1 starUpdated review April 29,2018:Needs an update to fix bugs and make it compatible with future updates) I love this game don't get me wrong but one of the things that needs to happen is it definitely needs an update I've noticed this app is a bit sluggish on my new iPhone 8 I really was hoping that they would release a new brothers in arms like they talked about on the internet I saw 2 years ago they were trying to develop a brothers in arms 4 sons of war what happened to that??? But anyways this app definitely needs a huge overhaul especially multiplayer because right now everything seems really slow and sluggish on my iPhone 8 please fix this issue I really want to get back to playing this game but it's pretty hard to do when I have the iPhone 8 and it's having a compatibility issue so please fix this The developer, Gameloft, has not provided details about its privacy practices and handling of data to Apple.
